

Snapshot of Our Product Offerings

This is a bird's-eye-view of where our products are working for the society.

Power Stations

Hydraulic turbine generator

Semiconductor Production Plants

Dynamic voltage compensator

Photovoltaic power generating system

Industrial controller

Substations

Substation plant

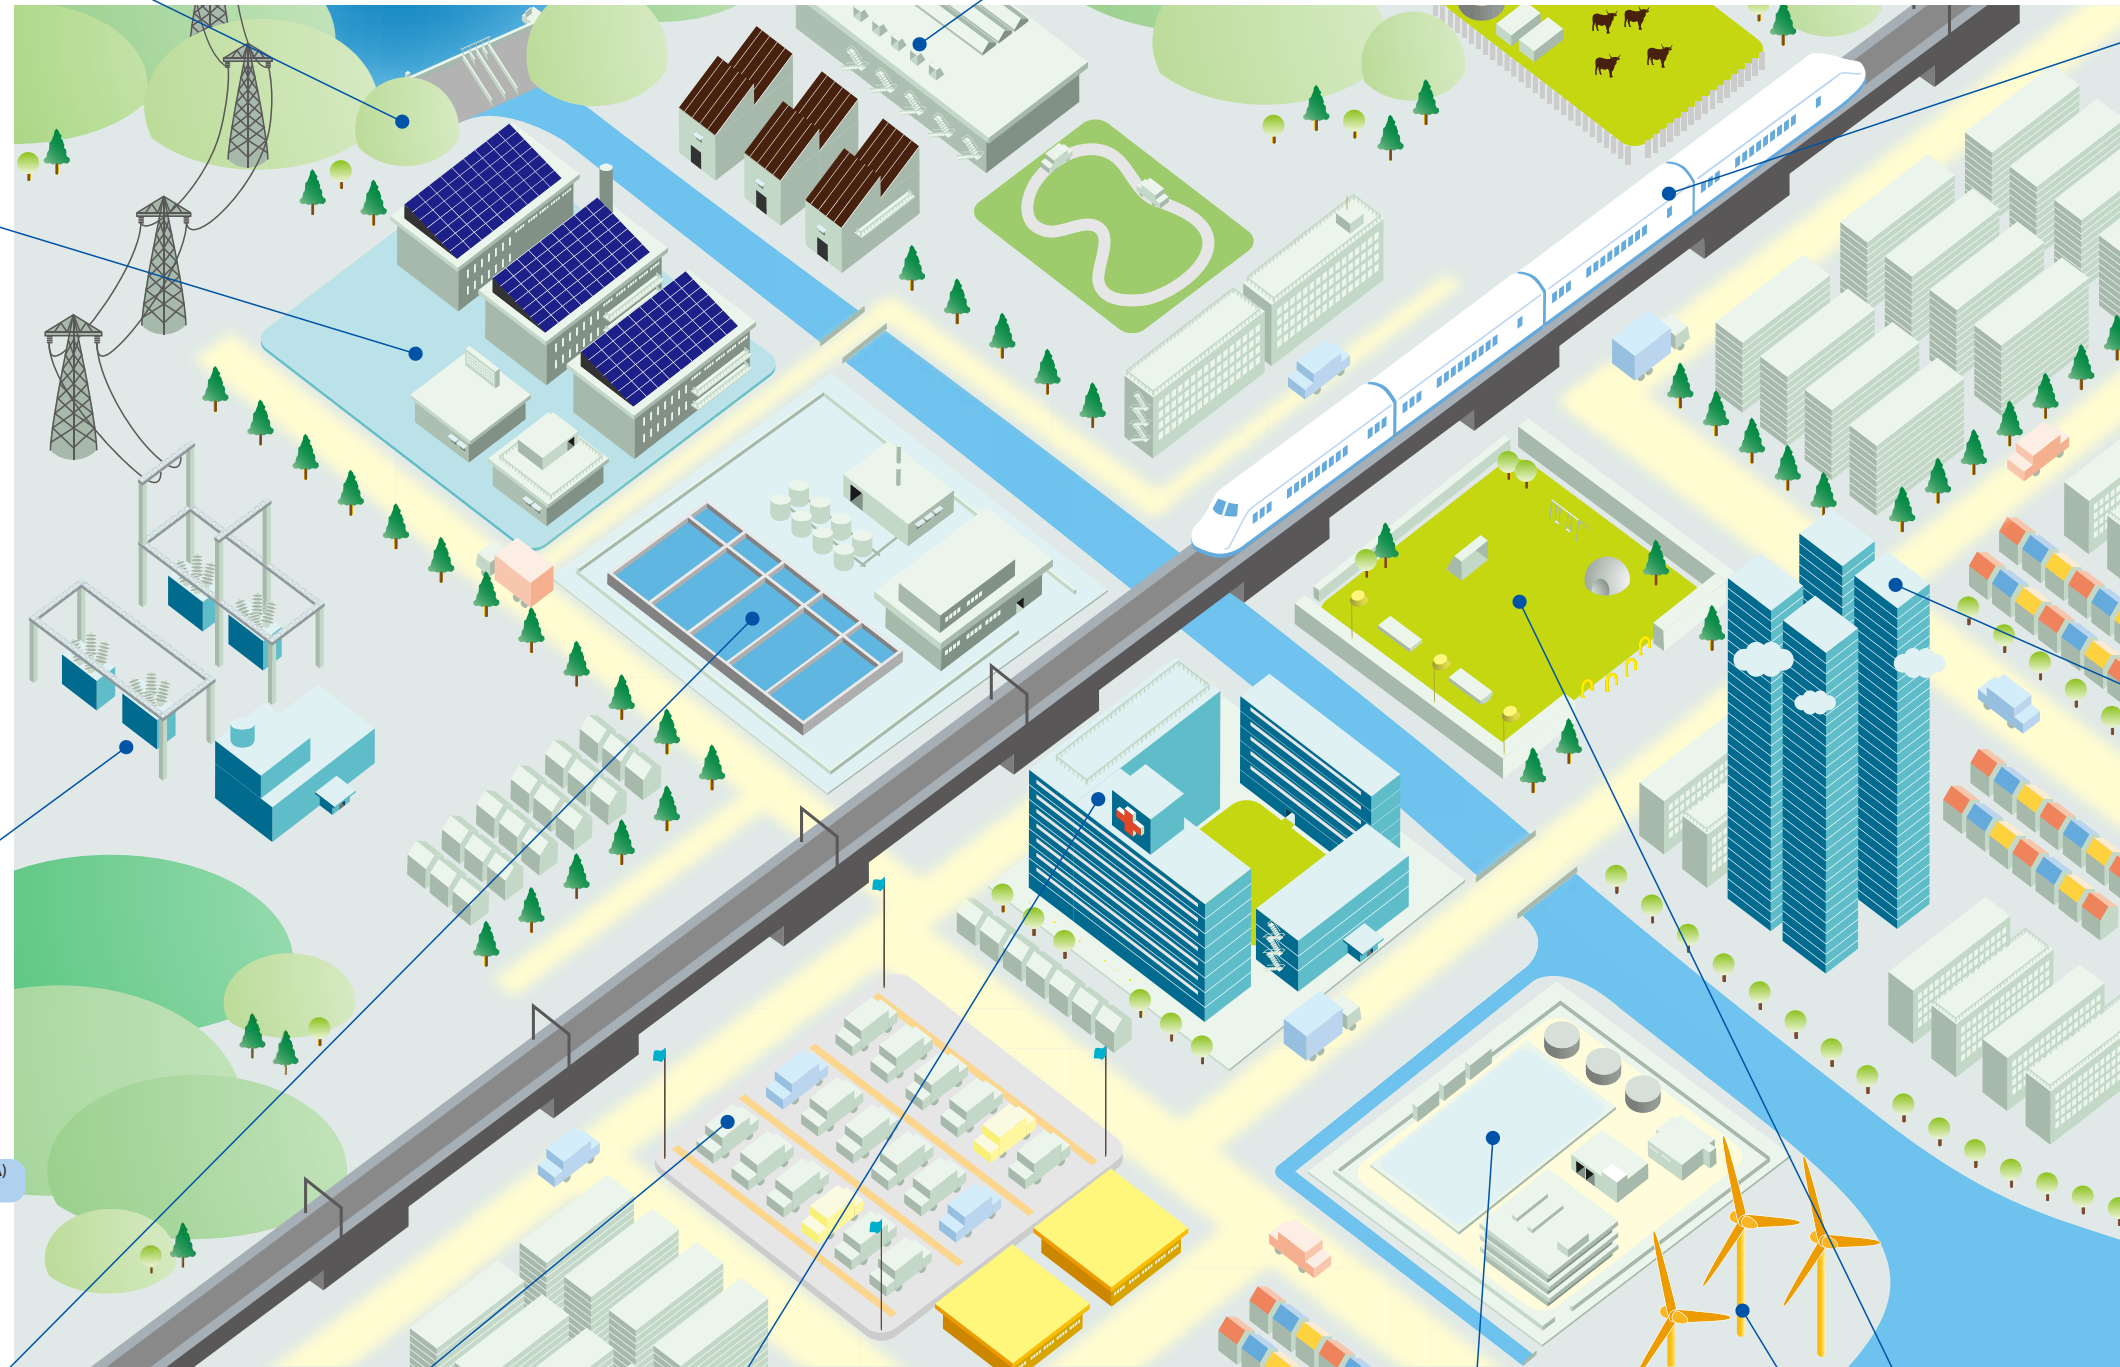

Supervisory control and data acquisition (SCADA) system for power stations and substations

Water Treatment Plants

Total monitoring system for water supply and sewage system

Automobile Plants

Automated guided vehicle (AGV)

Dynamometer

Railways

Protection relay & control panel for "Shinkansen Line"

Traction substation for railways

High-rise Buildings

Motor drive system for elevators

Elevator motor

Elevator inverter

Electric Vehicles (EV)

Drive system for EV

Hospitals

Emergency gas turbine generator

Cogeneration system (combined heat and power system)

Sewage Treatment Plants

Supervisory control system for sewage treatment system

Wind Power Generation

Wind turbine generator system

Parks

Mobile power generating system

In-house water supply system
